Binary Div   *Karachi (Hybrid), Pakistan*

- Developed and maintained web applications using NestJS, React.js, TypeScript, Prisma, and MySQL.
- Actively participated in the entire software development lifecycle, including design, implementation, and testing of scalable solutions.

- Demonstrated proficiency in both backend and frontend technologies, specializing in developing efficient APIs, designing optimized database schemas, and creating intuitive user interfaces.

PROJECTS

Recent freelance project. Leveraging Hume.com's APIs, I constructed a user-centric website that tailors the user experience based on sentiment. This API integration empowered the website to analyze user interactions and personalize the content or recommendations accordingly, enhancing user engagement.

Pamper's Diaper Size Tracker. Diaper size tracker app at P&G (Pamper) , focusing on back-end development for seamless functionality and precise size recommendations based on survey data. Contributing as a back-end developer, integrating ML model , hosted on Google cloud, for accurate diaper size predictions in the app.

Sol Patrol A blockchain-NFT based game using Honeycomb protocol where the user can send his recruited Sol Patrol or binary force NFTs to the mission.

ENT A platform where you can post your videos related to any talent and your talent will be judged by judges and you will get prize.

Wish By Star A platform where you can request a star or a celebrity to make a birthday wish or any other greeting type video for you or your friend.

3W Smart First Aid. A CRM that manages the first aid services for Canadian first aid company.

LANGUAGE.

- English (C1)
- German (Learning A1)
